

# CONNECT THE DOTS

## Hiding in the Grass

This animal can be found in grassy areas, forests and wet places like ponds. It blends in with the ground and plants to hide from predators (animals that would eat it). Connect the dots to find out which animal is hidden in the grass.

**Q:** Some animals protect themselves by blending in with what's around them, called camouflage. Do you think it blends in better by moving or being very still?

A: Being very still!

If you sit or creep very quietly in your garden or park maybe you will spot a hidden frog! If you make a drawing, poem or song of your frog, we would love to see or hear it!
