

# MATCHING GAME

## Hungry Animals

Wild animals need plants and other animals for food. Help these animals find one of their favourite foods.

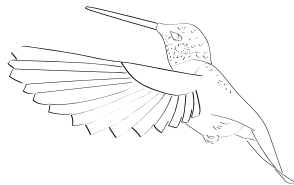

**Q:** I wonder what bees eat?

Black-capped Chickadee

Grub

Ruby-throated Hummingbird

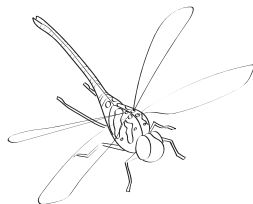

Mosquito

Striped Skunk

Sunflower seed

Canada Darner Dragonfly

Native lily

**A:** Bees eat flower pollen and nectar!

Did you see an animal feeding today? See if you can spot one in your garden or around town. If you make a drawing, poem or song of animals feeding in your neighbourhood, we would love to see or hear it!
