

MAZE

Search for Acorns

In the summer Blue Jays hide nuts and seeds in different places so they can eat them in winter when there is less food. Now it's winter, help this hungry Blue Jay find its buried acorns.

Q: I wonder what tree makes acorns?

A: Oak trees make acorns!

Did you see a bird today? See how many you can spot in your garden or around town. If you make a drawing, poem or song of the birds in your neighbourhood, we would love to see or hear it!
