

# Activity: Make a monarch

In this activity, you will create a reminder of the important work that you are doing to help monarch butterflies.

- Print out the colouring page. Ask your teacher to help you select the 'double-sided' print option. If you cannot print double-sided, glue both sheets back to back.
- Notice the colour differences on the back side and belly side of the monarch in the photo.
- Colour both sides of the monarch.
- Cut-out the monarch and fold it in half.
- Ask your teacher where everyone can put up their monarch in one spot. It should be in a place where your class or group will see it every day.

Once all of your coloured cut-outs are posted together, they will look like monarchs do in winter when they huddle together in a tree!
